ACCOUNTING 6080
Sample Waiver Exam #1 – Questions

Instructions:

- Please print your name in the space provided above
- The exam is open-book, open-notes; electronic devices are allowed.
- The exam is to be done individually!

Question	**Points Possible**	**Points Scored**
Question I Mechanics	14	________
Question II Miscellaneous	13	________
Question III Revenue Recognition	10	________
Question IV FS Analysis	13	________
Question V Cash Flow (Procter & Gamble)	10	________
Question VI Accounts Receivable (Dow)	15	________
Question VII Long Term Assets (Dow)	9	________
Question VIII Stockholders' Equity (Dow)	12	________
Question IX Income Taxes (Dow)	11	________
Question X Inventory (Valero)	11	________
Question XI Long Term Debt (Valero)	19	________
TOTAL	**137**	

Question I: (14 points) Journal Entries

Give me the Journal Entries for each of the following transactions / events. Also tell me what section(s) of the Cash Flow Statement are affected (if any). Answer each of these independently

1. (3 pts) A firm borrows $10,000 in cash in the form of a long-term note.

2. (3 pts) A firm buys Inventory on Credit for $20,000.

3. (4 pts) Employees earn $40,000 in wages this year. Of this amount, $35,000 was paid in cash and the remainder will be paid next year.

4. (4 pts) A firm sells Inventory that originally cost them $60,000. The inventory had been purchased and paid for last year. The firm receives $25,000 in Cash and also receives a Receivable in the amount of $40,000.

    - What are the journal entries this year?

Question II (13 points) Miscellaneous

Answer each of the following independently

1. (8 pts) Suppose that Retained Earnings was $150,000 at the beginning of the year. During the year, we did the following (all of this has already been entered into the accounts, and the closing entries have taken place): Some of these might not be relevant!

Issued Shares (for cash) worth	$ 40,000
Bought Back Shares (for cash) worth	$ 20,000
Issued Long Term Debt (for cash) worth	$ 17,000
Recognized Net Income of	$ 90,000
Invested in Long Term Assets (for cash) worth	$ 5,000
Sold Marketable Securities (for cash) worth	$ 20,000
Declared and Paid Dividends of	$ 30,000

(a) (4 pts) What was the ending balance for Retained Earnings?

(b) (4 pts) How much was Cash From Financing Activities?

2. (5 pts) **Closing Entry** - THIS IS INDEPENDENT OF THE PRIOR PROBLEMS

At the end of the year, the company's books contain the following Trial Balances (All Adjusting Entries have already been made). That is, **all** entries have been made except the closing entries. Note that not all balance sheet accounts are shown.

	Adjusted Trial Balance
Accounts Payable	100,000
Accumulated Depreciation and Amortization	200,000
Common Stock	350,000
Cost of Goods Sold	300,000
Depreciation and Amortization Expense	50,000
Dividends Payable	10,000
Interest Expense	40,000
Interest Payable	220,000
Inventory	140,,000
Litigation Loss	60,000
Retained Earnings	2,000,000
Sales Revenue	1,000,000
Selling and Administrative Expenses	400,000

- **(5 pts) What is the Closing Journal Entry for the year?**

Account Titles	**Debit**	**Credit**

Question III (10 points) – Revenue Recognition

On January 1, 2022, a firm signs a customer to a 4-year, noncancelable contract for subscription services. The total cost is $4800, payable in annual installments. The service commences immediately (on January 1, 2022). The bill each year is sent on January 1, and it is due in 30 days.

1. (4 pts) What journal entry (or entries) does the firm make on January 1, 2022? (if any)

2. (3 pts) What journal entry (or entries) does the firm make at the end of each month to record pro-rata delivery of service (if any)?

3. (3 pts) What is the balance for Unearned Revenue on the balance sheet on December 31, 2022?

Question IV (13 points) Financial Statement Analysis

Below are selected financial ratios for two years from a company. **Note that ROE, which is an important measure of firm profitability, is higher in year 2 than in year 1**.

	Year 2	Year 1
ROE = Net Income / Stockholders Equity	83.33%	73.91%
Quick Ratio = Quick Assets / Current Liabilities	0.75	0.69
Profit Margin = Net Income / Sales	12.50%	9.71%
Leverage Ratio Version A = Liabilities / Stockholders Equity	2.33	1.17
Leverage Ratio Version B = Assets / Stockholders Equity	3.33	2.17
Leverage Ratio Version C = Liabilities / Total Assets	0.70	0.54
Return on Assets = Net Income / Total Assets	25.00%	34.00%
Current Ratio = Current Assets / Current Liabilities	1.25	1.25
Asset Turnover Ratio = Sales / Assets	2.00	3.50

1. (13 pts) Given the ratios above, explain what the drivers were of the increase in ROE. Provide as much detail as you can. Explain which specific ratios you are referring to, and use the numbers to explain the magnitudes of the effects (not just the directions). NOTE THAT I AM ONLY INTERESTED IN PROFITABILITY HERE – NOT LIQUIDITY OR SOLVENCY. HINT – SOME OF THE RATIOS ARE IRRELEVANT!

Question V – (10 points) Cash Flow Statement

Refer to the excerpts (contained at the back of this booklet) from the 2021 Annual Report of Procter and Gamble (P&G)

1. (3 pts) How much did P&G spend on business acquisitions in 2019? **NOTE THE YEAR!**

2. (3 pts) In which year did Accounts Receivable increase the most? Explain.

3. (4 pts) P&G had a huge outflow of cash in 2021 related to FINANCING Activities. What were the two types of financing activities for which P&G's outflows were most different than for the corresponding activity in 2020?

Question VI (15 points)   Accounts Receivable -- DOW

Refer to the excerpts from **Dow's** financial statements. Assume a tax rate of 20% if necessary.

1. (3 pts) How much do customers owe to Dow at the end of 2021? Use the Trade Accounts Receivable, not the "Other" Accounts Receivable. Also ignore Noncurrent Receivables.

2. (4 pts) What was the journal entry for Dow's bad debt expense in 2021?

3. (3 pts) How much was Dow allowed to deduct on their income taxes related to bad debt / writeoffs / customer defaults during 2021?

4. (5 pts) Assume that Dow's bad debt expense is contained in their Selling, General and Administrative Expense line on the income statement. How much did Dow collect from customers in 2021?

Question VII. (9 Points) Long Term Assets -- DOW

Refer to the excerpts from **Dow's** financial statements. If you need to **assume** a tax rate, use a 20% tax rate.

1. (2 pts) How much was Dow's R&D Expense in 2021?

2. (3 pts) How much Goodwill did Dow write down (impair) in **2019**? (Note the year!)

3. (4 pts) Dow's Goodwill also went down in 2021. Was this also from impairment? Explain.

Question VIII (12 points) Shareholders' Equity -- DOW

Refer to the excerpts from **Dow's** financial statements. If you need to **assume** a tax rate, use a 20% tax rate.

1. (2 pts) What is the **par value** per share of Dow's common shares?

2. (3 pts) How many common shares **outstanding** does Dow have at the END of 2021?

3. (3 pts) What is the average price Dow has paid for the Treasury shares still listed on its balance sheet at the end of 2021? (not how much did they pay IN 2021)

4. (2 pts) How much did Dow pay (in cash) in dividends to stockholders in 2021?

5. (2 pts) How much in stock-based compensation expense did Dow recognize during 2021?

Question IX (11 points) Income Taxes -- DOW

Refer to the excerpts from **Dow's** financial statements. If you need to **assume** a tax rate, use a 20% tax rate. (Of course, if you're asked to calculate a tax rate, 20% is probably not the right answer for this question).

1. (2 pts) How much is DOW's **income tax expense** (on continuing operations) in year 2021? (You do not need to separately provide Federal, State and Foreign tax expenses, just the total). Be sure to indicate if this is an expense or a benefit.

2. (2 pts) How much is DOW's **Current Portion of their Income Tax Expense** in 2021? (You do not need to separately provide Federal, State and Foreign components of this, just the total). Be sure to indicate if this is an expense or a benefit.

3. (3 pts) What was Dow's effective tax rate in 2021?

4. (4 pts) What is the biggest reason why Dow's effective tax rate is so much HIGHER than the US Federal rate in 2020? (**NOTE THE YEAR!**) Give me the "line item" and explain why this increases Dow's effective tax rate

X. Inventory (11 points) - VALERO

Refer to the excerpts from **Valero** Corporation's financial statements. Valero is an Oil and Gas Company. Assume a 20% tax rate if necessary.

1. (3 pts) How much is Valero's LIFO Reserve at the end of 2021? (give me a number)

2. (4 pts) Valero's pre-tax income in 2021 was $1,543 (in millions). What would their pre-tax income have been in 2021 had they always been using FIFO for their inventory valuation? (give me a number)

3. (4 pts) How much has Valero saved in taxes cumulatively through the end of 2021 through the use of LIFO? (assume a 20% tax rate has always applied)

Question XI (19 points) Long Term Debt -- VALERO

Refer to the excerpts from **Valero's** financial statements. Valero is an Oil and Gas company. If you need to **assume** a tax rate, use a 20% tax rate.

1. (4 pts) If debt was issued at a discount, which of the following is true (Circle one)
   - Interest Expense is smaller than Coupon Payment
   - Interest Expense is equal to the Coupon Payment
   - Interest Expense is greater than the Coupon Payment

2. (3 pts) What is the fair value of Valero's debt (excluding leases) at the end of 2021? (give me a dollar number)

3. (4 pts) Based on the comparison of Valero's book value and fair value of their debt (excluding leases), what has happened to market interest rates, on average, since their debt was issued? (Circle one)
   - Interest Rates Went Down
   - Interest Rates Have Stayed the Same
   - Interest Rates Went Up

4. (8 pts) Consider Valero's **4% Senior Notes due in 2029**. For convenience, assume that the interest payments are due on June 30 and December 31. Therefore, this debt is due exactly 8 years (or 16 semi-annual periods) from the date of the financial statements. Suppose market interest rates jumped to 10% at the end of December 31, 2021 (remember that we have to use semi-annual compounding).

   a. (4 pts) What is the semi-annual coupon payment that Valero makes on this debt?

   b. (4 pts) What effect does this spike in interest rates have on the **book value** of this Senior Note? (circle one)

      - Decreases the Book Value
      - Has No Effect on the Book Value
      - Increases the Book Value

NOTE 6 – RESTRUCTURING, GOODWILL IMPAIRMENT AND ASSET RELATED CHARGES - NET

The "Restructuring, goodwill impairment and asset related charges - net" line in the consolidated statements of income is used to record charges for restructuring programs, goodwill impairments, and other asset related charges, which includes other asset impairments.

2019 Goodwill Impairment

Upon completion of the goodwill impairment testing in the fourth quarter of 2019, the Company determined the fair value of the Coatings & Performance Monomers reporting unit was lower than its carrying amount. As a result, the Company recorded an impairment charge of $1,039 million in the fourth quarter of 2019, related to Performance Materials & Coatings. See Note 13 for additional information.

Asset Related Charges

2020 Charges

In 2020, the Company recognized pretax impairment charges of $49 million, including additional pretax impairment charges for capital additions made to a bio-ethanol manufacturing facility in Santa Vitoria, Minas Gerais, Brazil ("Santa Vitoria"), which was impaired in 2017 and divested in 2020, as well as charges for miscellaneous write-offs and write-downs of non-manufacturing assets and the write-down of certain corporate leased equipment. The impairment charges related to Packaging & Specialty Plastics ($19 million), Performance Materials & Coatings ($15 million) and Corporate ($15 million). See Note 23 for additional information.

2019 Charges

the fourth quarter of 2019, upon completion of an evaluation of its equity method investment in Sadara Chemical Company ("Sadara") for other-than-temporary impairment, the Company determined that its investment in Sadara was other-than-temporarily impaired and it was written down to zero. Additionally, as part of Dow's evaluation of Sadara, the Company reserved certain of its notes and accounts receivable with Sadara due to uncertainty on the timing of collection. As a result, the Company recorded a $1,755 million charge, related to Packaging & Specialty Plastics ($370 million), Industrial Intermediates & Infrastructure ($1,168 million) and Corporate ($217 million). See Notes 12 and 23 for additional information.

Supplemental Cash Flow Information

The following table shows cash paid for interest and income taxes for the years ended December 31, 2021, 2020 and 2019:

Supplemental Cash Flow Information In millions	*2021*	*2020*	*2019*
Cash paid during year for:			
Interest	$ 801	$ 842	$ 993
Income taxes	$ 731	$ 518	$ 881

NOTE 8 – INCOME TAXES

The financial statements for Dow Inc. and TDCC are substantially similar, including the reporting of current and deferred tax expense (benefit), provision for income taxes on continuing operations, and deferred tax asset and liability balances. As a result, the following income tax discussion pertains to Dow Inc. only.

Geographic Allocation of Income and Provision for Income Taxes on Continuing Operations In millions	*2021*	*2020*	*2019*
Income (loss) from continuing operations before income taxes			
Domestic [1]	$ 1,523	$ (681)	$ (1,196)
Foreign [2]	6,622	2,752	(51)
Income (loss) from continuing operations before income taxes	$ 8,145	$ 2,071	$ (1,247)
Current tax expense (benefit)			
Federal	$ (46)	$ (176)	$ (287)
State and local	48	4	25
Foreign	1,460	691	960
Total current tax expense	$ 1,462	$ 519	$ 698
Deferred tax expense (benefit)			
Federal	$ 130	$ 184	$ 52
State and local	26	19	19
Foreign	122	55	(299)
Total deferred tax expense (benefit)	$ 278	$ 258	$ (228)
Provision for income taxes on continuing operations	$ 1,740	$ 777	$ 470
Income (loss) from continuing operations, net of tax	$ 6,405	$ 1,294	$ (1,717)

1. The 2019 amount includes approximately $1.4 billion of expense related to goodwill impairment and environmental matters. See Notes 13 and 16 for additional information.
2. The 2019 amount includes approximately $1.8 billion of expense for Sadara related charges. See Note 12 for additional information.

Reconciliation to U.S. Statutory Rate	*2021*	*2020* [1]	*2019* [1]
Statutory U.S. federal income tax rate	21.0 %	21.0 %	21.0 %
Equity earnings effect	(2.2)	0.2	(3.2)
Foreign income taxed at rates other than the statutory U.S. federal income tax rate	(1.3)	(2.3)	(14.8)

Impact of tax reform [3]	—	—	11.1
Federal tax accrual adjustment [4]	(5.3)	0.3	10.4
State and local income taxes	0.2	0.3	(4.4)
Sadara related charges [5]	—	—	(29.5)
Goodwill impairment [6]	—	—	(17.5)
Other - net	—	(0.7)	(13.7)
Effective tax rate	21.4 %	37.5 %	(37.7)%

1. Certain prior year rates have been adjusted to conform with the current year presentation.
2. The 2020 impact relates to the divestiture of a bio-ethanol manufacturing facility in Brazil. See Note 6 for additional information.
3. Includes the impact of tax reform in Switzerland and the United States.
4. The 2021 impact represents a capital loss incurred on an internal restructuring fully offset by a valuation allowance reported in "Changes in valuation allowances" line item. The 2019 impact primarily relates to the favorable impact of the restoration of tax basis in assets, driven by a court judgment that did not involve the Company.
5. See Note 12 for additional information.
6. See Note 13 for additional information.

The Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”) was enacted on March 27, 2020 in the United States. While the CARES Act had no significant impact on the Company's provision for income taxes on continuing operations in 2020, the Company filed a tax loss carryback claim for $291 million in accordance with the provisions of the CARES Act in 2020. This resulted in an increase in "Accounts and notes receivable - other" and a decrease in "Deferred income tax assets" in the consolidated balance sheets. In 2021, the Company received $247 million of the tax loss carryback claim with the residual balance expected to be received in 2022.

In the fourth quarter of 2020, a valuation allowance of $260 million was recorded in the United States, primarily due to filing of the final combined Dow and DuPont tax return and related unutilized foreign tax credits. In 2021, the Company's strong earnings and revised projections resulted in a reversal of the valuation allowance.

NOTE 13 – GOODWILL AND OTHER INTANGIBLE ASSETS

The following table shows changes in the carrying amounts of goodwill by reportable segment for the years ended December 31, 2021 and 2020:

Goodwill In millions	*Packaging & Specialty Plastics*	*Industrial Intermediates & Infrastructure*	*Performance Materials & Coatings*	*Total*
Balance at Jan 1, 2020	$ 5,109	$ 1,100	$ 2,587	$ 8,796
Foreign currency impact	12	4	106	122
Sale of rail infrastructure	(2)	—	—	(2)
Sale of marine and terminal infrastructure	(4)	(4)	—	(8)
Balance at Dec 31, 2020	$ 5,115	$ 1,100	$ 2,693	$ 8,908
Foreign currency impact	(10)	(4)	(130)	(144)
Balance at Dec 31, 2021	$ 5,105	$ 1,096	$ 2,563	$ 8,764

The separation from DowDuPont did not impact the composition of the Company's six reporting units: Coatings & Performance Monomers, Consumer Solutions, Hydrocarbons & Energy, Industrial Solutions, Packaging and Specialty Plastics and Polyurethanes & Construction Chemicals. The ECP businesses received as part of the separation from DowDuPont are included in the Hydrocarbons & Energy and Packaging and Specialty Plastics reporting units. At December 31, 2021, goodwill was carried by all reporting units except Coatings & Performance Monomers ("C&PM").

Goodwill Impairments

The carrying amounts of goodwill at December 31, 2021 and 2020 were net of accumulated impairments of $309 million in Industrial Intermediates & Infrastructure and $2,530 million in Performance Materials & Coatings.

Goodwill Impairment Testing

The Company performs an impairment test of goodwill annually in the fourth quarter. In 2021, the Company performed qualitative testing for all reporting units that carried goodwill. Based on the results of the qualitative testing, the Company did not perform quantitative testing on any reporting units (one in 2020 and two in 2019). The qualitative testing on the reporting units indicated that it was not more likely than not that fair value was less than the carrying value for the reporting units.

The quantitative testing conducted in 2020 concluded that no goodwill impairments existed.

Upon completion of the quantitative testing in the fourth quarter of 2019, the Company determined the C&PM reporting unit was impaired. During 2019, the C&PM reporting unit did not consistently meet expected financial performance targets, primarily due to the industry's increased captive use of coatings products, which led to volume reductions; reduced margins for products across the portfolio due to changes in customer buying patterns and supply and demand balances; as well as a continuous trend of customer consolidation in end-markets, which reduced growth opportunities. As a result, the C&PM reporting unit lowered its future revenue and profitability projections. The fair value of the C&PM reporting unit was determined using a discounted cash flow methodology that reflected reductions in projected revenue growth rates due to lower sales volume and price assumptions, as well as reductions to future growth rates. These discounted cash flows did not support the carrying value of the C&PM reporting unit. As a result, the Company recorded a goodwill impairment charge of $1,039 million in the fourth quarter of 2019, included in "Restructuring, goodwill impairment and asset related charges - net" in the consolidated statements of income and related to the Performance Materials & Coatings segment. The carrying value of the C&PM reporting unit's goodwill was zero at December 31, 2019. No other goodwill impairments were identified as a result of the 2019 testing.

Other Intangible Assets

The following table provides information regarding the Company's other intangible assets:

Other Intangible Assets at Dec 31	*2021*			*2020*		
In millions	*Gross Carrying Amount*	*Accum Amort*	*Net*	*Gross Carrying Amount*	*Accum Amort*	*Net*

Ending balance	$ (347)	$ (470)	$ (394)
Total AOCL ending balance	$ (8,977)	$ (10,855)	$ (10,246)

1. Reclassified to "Net sales" and "Sundry income (expense) - net."
2. Reclassified to "Provision for income taxes on continuing operations."
3. Reclassified to "Sundry income (expense) - net."
4. Reclassified to "Retained earnings" as a result of the separation from DowDuPont on April 1, 2019. See Note 3 for additional information.
5. These AOCL components are included in the computation of net periodic benefit cost of the Company's defined benefit pension and other postretirement benefit plans. See Note 20 for additional information.
6. Reclassified to "Cost of sales," "Sundry income (expense) - net" and "Interest expense and amortization of debt discount."

NOTE 21 – STOCK-BASED COMPENSATION

The Company provides stock-based compensation in the form of the Employee Stock Purchase Plan, which grants eligible employees the right to purchase shares of the Company's common stock at a discounted price. The Company also grants stock-based compensation to employees and non-employee directors under stock incentive plans, in the form of stock options, stock appreciation rights, PSUs and RSUs.

I

I

The total stock-based compensation expense included in continuing operations in the consolidated statements of income was $276 million, $171 million and $158 million in 2021, 2020 and 2019, respectively. The income tax benefits related to stock-based compensation arrangements were $62 million, $39 million and $36 million in 2021, 2020 and 2019, respectively. Amounts disclosed throughout the remainder of this footnote are inclusive of activity attributable to both continuing operations and discontinued operations, as the impact of discontinued operations is not significant.

Accounting for Stock-Based Compensation

The Company grants stock-based compensation awards that vest over a specified period or upon employees meeting certain performance and/or retirement eligibility criteria. The fair value of equity instruments issued to employees is measured on the grant date. The fair value of equity and liability instruments is expensed over the vesting period or, in the case of retirement, from the grant date to the date on which retirement eligibility provisions have been met and additional service is no longer required. The Company estimates expected forfeitures based on historical activity.

Stock Incentive Plan

Stock Options

The Company grants stock options to certain employees, subject to certain annual and individual limits, with terms of the grants fixed at the grant date. The exercise price of each stock option equals the market price of the common stock on the grant date. Options vest from one year to three years and have a maximum term of ten years. The following table summarizes stock option activity for 2021:

Stock Options Shares in thousands	2021	
	Shares	*Exercise Price* [1]
Outstanding at Jan 1, 2021	20,252	$ 47.44
Granted	1,309	$ 57.67
Exercised	(5,179)	$ 39.97
Forfeited/Expired	(102)	$ 60.36
Outstanding at Dec 31, 2021	16,280	$ 50.56
Remaining contractual life in years		4.65
Aggregate intrinsic value in millions	$ 141	
Exercisable at Dec 31, 2021	13,106	$ 49.96
Remaining contractual life in years		3.75
Aggregate intrinsic value in millions	$ 128	

1. Weighted-average per share.

Additional Information about Stock Options In millions, except per share amounts	*2021*	*2020*	*2019*
Weighted-average fair value per share of options granted	$ 10.37	$ 5.89	$ 7.99
Total compensation expense for stock option plans	$ 14	$ 22	$ 23
Related tax benefit	$ 3	$ 5	$ 5
Total amount of cash received from the exercise of options	$ 217	$ 108	$ 93
Total intrinsic value of options exercised [1]	$ 121	$ 41	$ 77
Related tax benefit	$ 27	$ 9	$ 17

1. Difference between the market price at exercise and the price paid by the employee to exercise the options.

Total unrecognized compensation cost related to unvested stock option awards of $5 million at December 31, 2021, is expected to be recognized over a weighted-average period of 1.47 years.

5. INVENTORIES

Inventories consisted of the following (in millions):

	December 31, 2021	December 31, 2020
Refinery feedstocks	$ 1,995	$ 1,979
Refined petroleum products and blendstocks	3,567	3,425
Renewable diesel feedstocks and products	135	50
Ethanol feedstocks and products	273	297
Materials and supplies	295	287
Inventories	$ 6,265	$ 6,038

We compare the market value of inventories to their cost on an aggregate basis, excluding materials and supplies. In determining the market value of our inventories, we assume that feedstocks are converted into refined products, which requires us to make estimates regarding the refined products expected to be produced from those feedstocks and the conversion costs required to convert those feedstocks into refined products. We also estimate the usual and customary transportation costs required to move the inventory from our plants to the appropriate points of sale. We then apply an estimated selling price to our inventories. If the aggregate market value is less than the aggregate cost, we recognize a loss for the difference in our statements of income.

The market value of our LIFO inventories fell below their LIFO inventory carrying amounts as of March 31, 2020, and as a result, we recorded an LCM inventory valuation reserve of $2.5 billion in order to state our inventories at market.

As of December 31, 2021 and 2020, the replacement cost (market value) of LIFO inventories exceeded their LIFO carrying amounts by $5.2 billion and $1.3 billion, respectively.

Sample Waiver Exam #1 – Solution

Instructions:

- Please print your name in the space provided above
- The exam is open-book, open-notes; electronic devices are allowed.
- The exam is to be done individually!

Question	Points Possible	Points Scored
Question I Mechanics	14	________
Question II Miscellaneous	13	________
Question III Revenue Recognition	10	________
Question IV FS Analysis	13	________
Question V Cash Flow (Procter & Gamble)	10	________
Question VI Accounts Receivable (Dow)	12	________
Question VII Long Term Assets (Dow)	9	________
Question VIII Stockholders' Equity (Dow)	12	________
Question IX Income Taxes (Dow)	11	________
Question X Inventory (Valero)	11	________
Question XI Long Term Debt (Valero)	19	________
TOTAL	**134**	

Question I: (14 points) Journal Entries

Give me the Journal Entries for each of the following transactions / events. Also, which section(s) of the Cash Flow Statement are affected (if any)? Answer each of these independently

1. (3 pts) A firm borrows $10,000 in cash in the form of a long-term note.

Dr	Cash		10,000	
	Cr	Notes Payable		10,000

Affects the Financing Section of the Cash Flow Statement (it's an inflow)

2. (3 pts) A firm buys Inventory on Credit for $20,000.

Dr	Inventory		20,000	
	Cr	Accounts Payable		20,000

Cash Flow Statement is not affected
(there are two offsetting adjusting entries in the operating section – but the overall effect on cash from operations is zero.

3. (4 pts) Employees earn $40,000 in wages this year. Of this amount, $35,000 was paid in cash and the remainder will be paid next year.

Dr	Wage Expense		40,000	
	Cr	Cash		35,000
		Wages Payable		5,000

Cash from operations is reduced by $35,000 (income goes down by 40 for the wage expense but is adjusted upwards by 5 for the increase in wages payable

4. (4 pts) A firm sells Inventory that originally cost them $60,000. The inventory had been purchased and paid for last year. The firm receives $25,000 in Cash and also receives a Receivable in the amount of $40,000.

- What are the journal entries this year?

Dr	Cash		25,000	
	Accounts Receivable		40,000	
	Cr	Sales Revenue		65,000
Dr	COGS		60,000	
	Cr	Inventory		60,000

Cash From Operations goes up by 25,000
Income goes up by 65,000 – 60,000 = 5,000. This is the starting point for cash from operations.
There is a positive adjustment of 60,000 for the decrease in Inventory and a negative adjustment of 40,000 in CFO for the increase in receivables. The overall effect is 5,000 + 60,000 – 40,000 = 25,000

Question II (13 points) Miscellaneous

Answer each of the following independently

1. (8 pts) Suppose that Retained Earnings was $150,000 at the beginning of the year. During the year, we did the following (all of this has already been entered into the accounts, and the closing entries have taken place): Some of these might not be relevant!

Issued Shares (for cash) worth	$ 40,000
Bought Back Shares (for cash) worth	$ 20,000
Issued Long Term Debt (for cash) worth	$ 17,000
Recognized Net Income of	$ 90,000
Invested in Long Term Assets (for cash) worth	$ 5,000
Sold Marketable Securities (for cash) worth	$ 20,000
Declared and Paid Dividends of	$ 30,000

(a) (4 pts) What was the ending balance for Retained Earnings?

Ending RE = Beg RE + Net Income – Dividends
= 150,000 + 90,000 – 30,000 = 150,000 + 60,000 = 210,000

(b) (4 pts) How much was Cash From Financing Activities?

Issued Shares gives us cash	40,000
Buying back shares costs us cash	(20,000)
Issuing long term debt gives us cash	17,000
Paying a dividend costs us cash	(30,000)
Cash from Financing	7,000

2. (5 pts) **Closing Entry** - THIS IS INDEPENDENT OF THE PRIOR PROBLEMS

At the end of the year, the company's books contain the following Trial Balances (All Adjusting Entries have already been made). That is, **all** entries have been made except the closing entries. Note that not all balance sheet accounts are shown.

	Adjusted Trial Balance
Accounts Payable	100,000
Accumulated Depreciation and Amortization	200,000
Common Stock	350,000
Cost of Goods Sold	**300,000**
Depreciation and Amortization Expense	**50,000**
Dividends Payable	10,000
Interest Expense	**40,000**
Interest Payable	220,000
Inventory	140,,000
Litigation Loss	**60,000**
Retained Earnings	2,000,000
Sales Revenue	**1,000,000**
Selling and Administrative Expenses	**400,000**

- **(5 pts) What is the Closing Journal Entry for the year?**

Account Titles	**Debit**	**Credit**
Sales Revenue	**1,000,000**	
COGS		**300,000**
Selling and Admin Expenses		**400,000**
Depreciation and Amortiz Expense		**50,000**
Litigation Loss		**60,000**
Interest Expense		**40,000**
Retained Earnings (plug)		**150,000**

Question III (10 points) – Revenue Recognition

On January 1, 2022, a firm signs a customer to a 4-year, noncancelable contract for subscription services. The total cost is $4800, payable in annual installments. The service commences immediately (on January 1, 2022). The bill each year is sent on January 1, and it is due in 30 days.

1. (4 pts) What journal entry (or entries) does the firm make on January 1, 2022? (if any)

   On January 1 we commenced providing service and we sent a bill

Dr	Accounts Receivable	1200		(=4800 / 4)
	Cr Unearned Revenue		1200	

   You Could use Deferred Revenue or Advances from Customers account titles instead

   Technically we could also record a day's worth of revenue.

2. (3 pts) What journal entry (or entries) does the firm make at the end of each month to record pro-rata delivery of service (if any)?

Dr	Unearned Revenue	100		($1/12^{th}$ of the annual amount)
	Sales Revenue		100	

3. (3 pts) What is the balance for Unearned Revenue on the balance sheet on December 31, 2022?

   ZERO – note that we haven't billed anything for the next year yet

Question IV (13 points) Financial Statement Analysis

Below are selected financial ratios for two years from a company. **Note that ROE, which is an important measure of firm profitability, is higher in year 2 than in year 1**.

	Year 2	**Year 1**
ROE = Net Income / Stockholders Equity	83.33%	73.91%
Quick Ratio = Quick Assets / Current Liabilities	0.75	0.69
Profit Margin = Net Income / Sales	12.50%	9.71%
Leverage Ratio Version A = Liabilities / Stockholders Equity	2.33	1.17
Leverage Ratio Version B = Assets / Stockholders Equity	3.33	2.17
Leverage Ratio Version C = Liabilities / Total Assets	0.70	0.54
Return on Assets = Net Income / Total Assets	25.00%	34.00%
Current Ratio = Current Assets / Current Liabilities	1.25	1.25
Asset Turnover Ratio = Sales / Assets	2.00	3.50

1. (13 pts) Given the ratios above, explain what the drivers were of the increase in ROE. Provide as much detail as you can. Explain which specific ratios you are referring to, and use the numbers to explain the magnitudes of the effects (not just the directions). NOTE THAT I AM ONLY INTERESTED IN PROFITABILITY HERE – NOT LIQUIDITY OR SOLVENCY. HINT – SOME OF THE RATIOS ARE IRRELEVANT!

First, we can decompose ROE into two drivers: Operating Performance and Financial Leverage

Operating Performance is Measured by ROA

Financial Leverage is Measure by Leverage Ratio B (Assets / Stockholders Equity)

$$\text{ROE} = \frac{\text{Net Income}}{\text{Share Equity}} = \frac{\text{Net Income}}{\text{Assets}} \times \frac{\text{Total Assets}}{\text{Share Equity}}$$

	Year 2	**Year 1**
ROE	83.33%	73.91%
ROA	25.00%	34.00%
Leverage Ratio B	3.33	2.17
Check: ROA x Lev	83.33%	73.91%

Note that the increase in ROE in year 2 is entirely driven by the increase in leverage! Operating Performance (ROA) is actually worse.

The firm did worse with its assets (in terms of ROA) but used a lot of debt to leverage this into a higher return for shareholders (but see the next part)

Next, we can decompose ROA into two drivers: Profit Margin and Asset Turnover

$$\text{ROA} = \frac{\text{Net Income}}{\text{Total Assets}} = \frac{\text{Net Income}}{\text{Sales}} \times \frac{\text{Sales}}{\text{Total Assets}}$$

	Year 2	**Year 1**
ROA	25.00%	34.00%
Profit Margin	12.50%	9.71%
Asset Turnover	2.00	3.50
Check: PM x AT	25.00%	34.00%

Vulcan's ROA in year 2 was lower despite a higher profit margin. This is because assets did not generate as many dollars in sales as in year 1.

If we had more detailed data, we could explore the reasons for the higher profit margin (and if we thought it was recurring). We could also look at why assets are not generating as much sales.

(maybe there is a big increase in assets – funded by debt – and it will take more time to see the increase in sales?)

Question V – (10 points) Cash Flow Statement

Refer to the excerpts (contained at the back of this booklet) from the 2021 Annual Report of Procter and Gamble (P&G)

1. (3 pts) How much did P&G spend on business acquisitions in 2019? **NOTE THE YEAR!**

   From the Investing Section: Acquisitions 3945

2. (3 pts) In which year did Accounts Receivable increase the most? Explain.

   An increase in receivables is a NEGATIVE adjustment on the cash flow statement
   The largest negative adjustment is (342) in 2021

(4 pts) P&G had a huge outflow of cash in 2021 related to FINANCING Activities. What were the two types of financing activities for which P&G's outflows were most different than for the corresponding activity in 2020?

Comparing 2021 and 2020 in the Financing Section, the biggest differences are

Reduction in Short Term debt: (3333) in 2021 compared to +2,345 in 2020
That is, the incurred more short term debt in 2020, and bought it back (or paid it off) in 2021

Treasury stock repurchases: (11,009) in 2021 compared to (7,405) in 2020
They bought back a lot more of their own shares

Question VI (15 points) Accounts Receivable -- DOW

Refer to the excerpts from **Dow's** financial statements. Assume a tax rate of 20% if necessary.

1. (3 pts) How much do customers owe to Dow at the end of 2021? Use the Trade Accounts Receivable, not the "Other" Accounts Receivable. Also ignore Noncurrent Receivables.

   From the Balance Sheet: Gross Receivables = Net Receivables + Allowance
   = 6841 + 54 = 6895

2. (4 pts) What was the journal entry for Dow's bad debt expense in 2021?

   From Schedule II on p. 167, Bad Debt Expense = 16

Dr Bad Debt Expense	16	
Cr Allowance for Doubtful Accounts		16

3. (3 pts) How much was Dow allowed to deduct on their income taxes related to bad debt / writeoffs / customer defaults during 2021?

   This is the writeoffs. Also from Schedule II on p. 166
   Writeoffs = 13

4. (5 pts) Assume that Dow's bad debt expense is contained in their Selling, General and Administrative Expense line on the income statement. How much did Dow collect from customers in 2021?

Cash Collected = Sales Revenue – BD Expense – Change in Net AR from the cash flow statement

= 54,968 – 16 – 2,132 = 52,820

<u>Question VII. (21 Points) Long Term Assets -- DOW</u>

Refer to the excerpts from **Dow's** financial statements. If you need to **assume** a tax rate, use a 20% tax rate.

1. (2 pts) How much was Dow's R&D Expense in 2021?

   From the Income Statement, R&D Expense = 857

2. (3 pts) How much Goodwill did Dow write down (impair) in **<u>2019</u>**? (Note the year!)

   From p. 97, the impairment in 2019 was 1,039

3. (4 pts) Dow's Goodwill also went down in 2021. Was this also from impairment? Explain.

No, from the Table in the Goodwill footnote on p. 107, this decrease came from change in foreign currency exchange rates.

Question VIII (25 points) Shareholders' Equity -- DOW

Refer to the excerpts from **Dow's** financial statements. If you need to **assume** a tax rate, use a 20% tax rate.

1. (2 pts) What is the **par value** per share of Dow's common shares?

   From the Balance sheet: par value = $0.01

2. (3 pts) How many common shares **outstanding** does Dow have at the END of 2021?

   Shares Outstanding = Shares Issued – Treasury Shares

Shares Issued	764,226,882
Minus Treasury Shares	29,011,573
Shares Outstanding	735,215,309

3. (3 pts) What is the average price Dow has paid for the Treasury shares still listed on its balance sheet at the end of 2021? (not how much did they pay IN 2021)

   Be careful to get the numbers in a consistent order of magnitude

   $$\text{Avg price paid} = \frac{\text{Treasury stock balance}}{\text{Number of Treasury Shares}} \qquad \frac{1{,}625}{29.011573} = \$56.01$$

4. (2 pts) How much did Dow pay (in cash) in dividends to stockholders in 2021?

From the Cash Flow Statement

Cash Paid for Dividends = 2,073

5. (2 pts) How much in stock-based compensation expense did Dow recognize during 2021?

From the footnotes, p. 136
Stock compensation expense = 276

<u>Question IX (11 points) Income Taxes -- DOW</u>

Refer to the excerpts from **Dow's** financial statements. If you need to **assume** a tax rate, use a 20% tax rate. (Of course, if you're asked to calculate a tax rate, 20% is probably not the right answer for this question).

1. (2 pts) How much is DOW's **income tax expense** (on continuing operations) in year 2021? (You do not need to separately provide Federal, State and Foreign tax expenses, just the total). Be sure to indicate if this is an expense or a benefit.

   From Income Statement, Income Tax Expense = $1,740 (this is an expense)

2. (2 pts) How much is DOW's **Current Portion of their Income Tax Expense** in 2021? (You do not need to separately provide Federal, State and Foreign components of this, just the total). Be sure to indicate if this is an expense or a benefit.

   From Tax footnote, p. 99 Current Portion = $1,462 (also an expense)

3. (3 pts) What was Dow's effective tax rate in 2021?

   $$\text{Effective Tax Rate} = \frac{\text{Income Tax Expense}}{\text{Pre-tax Book Income}} = \frac{1{,}740}{8{,}145} = 21.4\%$$

   This is already calculated in the Income Tax Footnote, p. 100

4. (4 pts) What is the biggest reason why Dow's effective tax rate is so much HIGHER than the US Federal rate in 2020? (**NOTE THE YEAR!**) Give me the "line item" and explain why this increases Dow's effective tax rate

   The line item "Valuation Allowance" caused the effective tax rate to go up by 12.6% relative to the US Federal rate.
   This is because Dow increased their Valuation Allowance. This is an indicator that Dow does not expect to recover as much of their Deferred Tax Assets as they thought at the beginning of the year.
   The journal entry would be

Dr	Income tax expense	x	
	Cr Valuation Allowance		x

X. Inventory (11 points) - VALERO

Refer to the excerpts from **Valero** Corporation's financial statements. Valero is an Oil and Gas Company. Assume a 20% tax rate if necessary.

1. (3 pts) How much is Valero's LIFO Reserve at the end of 2021? (give me a number)

   From the inventory footnote on p. 86, LIFO Reserve = 5.2 (billion)

2. (4 pts) Valero's pre-tax income in 2021 was $1,543 (in millions). What would their pre-tax income have been in 2021 had they always been using FIFO for their inventory valuation? (give me a number)

   Change in LIFO Reserve = 5.2 – 1.3 = 3.9 billion

   FIFO pre-tax income (in millions) = LIFO Income + Change in LIFO Reserve
   = 1,543 + 3,900 = $5,443

   A HUGE DIFFERENCE!

3. (4 pts) How much has Valero saved in taxes cumulatively through the end of 2021 through the use of LIFO? (assume a 20% tax rate has always applied)

   Cumulative Tax Savings = LIFO Reserve x tax rate
   = 5.2 x .2 = $1.04

Question XI (19 points) Long Term Debt -- VALERO

Refer to the excerpts from **Valero's** financial statements. Valero is an Oil and Gas company. If you need to **assume** a tax rate, use a 20% tax rate.

1. (4 pts) If debt was issued at a discount, which of the following is true (Circle one)

   - Interest Expense is smaller than Coupon Payment
   - Interest Expense is equal to the Coupon Payment
   - ***Interest Expense is greater than the Coupon Payment***

   The extra interest expense increases the liability balance (or reduces the discount). The book value of the liability increases over time, and it eventually approaches the face value.

2. (3 pts) What is the fair value of Valero's debt (excluding leases) at the end of 2021? (give me a dollar number)

   From the last page, Fair Value of debt (excluding leases) 13,668

   Note that this is bigger than the book value of debt (excluding leases) of 11,950

3. (4 pts) Based on the comparison of Valero's book value and fair value of their debt (excluding leases), what has happened to market interest rates, on average, since their debt was issued? (Circle one)

   - ***Interest Rates Went Down***
   - Interest Rates Have Stayed the Same
   - Interest Rates Went Up

   The fair value of the debt is the present value of the remaining cash flows, discounted back at the current market rate of interest. The book value of the debt is the present value of the remaining cash flows, discounted back at the historical market rate of interest. If the fair value is higher, the current discount rate has to be lower.

4. (8 pts) Consider Valero's **4% Senior Notes due in 2029**. For convenience, assume that the interest payments are due on June 30 and December 31. Therefore, this debt is due exactly 8 years (or 16 semi-annual periods) from the date of the financial statements. Suppose market interest rates jumped to 10% at the end of December 31, 2021 (remember that we have to use semi-annual compounding).

   a. (4 pts) What is the semi-annual coupon payment that Valero makes on this debt?

      Coupon payment = face value x coupon rate / 2 = 1,000 x .04 / 2 = 20

   b. (4 pts) What effect does this spike in interest rates have on the **book value** of this Senior Note? (circle one)

      - Decreases the Book Value
      - ***Has No Effect on the Book Value***
      - Increases the Book Value

Under historical cost accounting (which is what Dow is using), the book values ignore subsequent changes
